EDUCATION

Bachelor of Computer Science Honours

Expected Graduation Date: April 2027

Carleton University, Ottawa ON | 3.83/4 GPA

- Pursuing a concentration in Artificial Intelligence and Machine Learning.
- Coursework: Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Systems Programming, Discrete Mathematics, Web Development. Linear Algebra, Calculus.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, JavaScript, HTML, CSS, SQL

Frameworks/Libraries: React.js, Node.js, Express.js, Scikit-learn, Pandas, NumPy, Streamlit, TailwindCSS, OpenAI API

Developer Tools: Git, GitHub, Linux, Docker, VS Code, IntelliJ, Eclipse, jsPDF

Other Skills: RESTful API Design, Frontend-Backend Integration, Database Design, Client-Server Communication

PROJECTS

ResuBoost – AI Resume Critique Tool (Full-Stack) [\[Live Demo\]](#) [\[GitHub\]](#)

- Built a full-stack web application using **React** (frontend) and **Express** (backend), integrated with **OpenAI's GPT-4o** to generate real-time AI-powered resume suggestions focused on clarity, impact, and wording.
- Built a responsive, fast-loading UI with **TailwindCSS**, achieving **<1s** load times across devices.
- Enabled users to download feedback via **jsPDF**, resulting in **100+** formatted resume reports generated.
- Deployed using Render and Vercel, with **150+** user interactions and consistent uptime across test sessions.
- **Tech:** React, Express, OpenAI API, TailwindCSS, jsPDF

PricePredict – Real Estate ML Estimator (AI/Machine Learning) [\[Live Demo\]](#) [\[GitHub\]](#)

- Developed a machine learning model using **Scikit-learn**, achieving an R^2 score of **0.73** and a Mean Absolute Error (MAE) of **~\$67,000**, predicting house prices using key features (e.g., bedrooms, bathrooms) from a **Kaggle** dataset.
- Engineered and preprocessed features to enhance model accuracy, generalizability, and interpretability enhancing model accuracy by **21%**.
- Developed and deployed an interactive **Streamlit** web app for real-time predictions, making the model accessible via a user-friendly interface.
- Awarded a **Bronze Merit Award** at the Bay Area Science and Engineering Fair for project innovation and impact.
- **Tech:** Python, Scikit-learn, Streamlit, Pandas, Numpy

SmartSearch – Java Search Engine (Back-End) [\[GitHub\]](#)

- Built a scalable search engine in Java using TF-IDF and cosine similarity to rank and retrieve **100+** documents with high relevance.
- Developed a web crawler that parsed content from **500+** web pages to populate the search index dynamically.
- Integrated PageRank-based boosting, improving ranking quality and surfacing more authoritative pages during testing.
- Applied object-oriented design principles to ensure modular, maintainable, and scalable code architecture.
- Designed an interactive JavaFX GUI that enabled intuitive search queries and real-time result display.
- **Tech:** Java, JavaFX, OOP, TF-IDF, PageRank

CERTIFICATIONS

Intro to Machine Learning

Certificate of completion

Kaggle

Feb 2023

WORK EXPERIENCE

Coding Tutor

Light of Islam Canada

July 2023 – August 2024

Brampton, ON

- Tutored **Python** and **Java**, improving student understanding of core concepts and earning positive feedback for clear explanations and student progress.
